CABLE MANAGEMENT

YellowDuct

Optical Fibre & Copper Ducting - Raceway

Solutions, Products & Accessories

We supply leading optical fibre and copper cabling products and solutions for various markets.

Our designers and engineers are constantly looking for ways to improve customer offerings and by working closely with our customers, the company is able to achieve continual improvement.

We listen, we respect and we deliver.

WB TelAssist iOS and Android app

The WB TelAssist app has been specifically developed by WBT for technicians, contractors and sub-contractors who install and maintain products in the Australian telecommunications network.

The app combines all technical resources including product guides, installation guides, safety data sheets, training videos and customer support into a single, easy to use app.

This optical fibre ducting raceway is a unique system for routing and protecting fibre optic cords between termination equipment, patch panels and fibre optic splicing frames in telecommunications exchanges and data centres. Easily mounted above equipment racks or below floors, it provides an easily accessible solution to any situation.

This YellowDuct ducting raceway is available in seven sizes. It is most important to select a size that allows for expansion and future additions to the ducting system. All too often cable systems are underspecified in order to reduce installation costs. In this world of the ever increasing need for the storage and processing of data it is a false economy to just specify for existing needs. It is ultimately more cost effective to plan for the future and over specify when it comes to capacity. Cable exit points and take offs also need to be taken into account as these components have different capacity ratings to the main ducting raceway.

These components simply snap together or can be joined with "slotless" joiners. Vertical drops can be positioned or added easily by adding a cutout in the horizontal duct raceway with a simple to operate hand tool or by using the express "over the top" drop option requiring no tools.

The unique design of the YellowDuct system protects the fibre from damage and ensures that the bend radius of the cable is not compromised. All components in the system are manufactured from Noryl, a very strong engineering plastic, which is self-extinguishing and halogen free (certified to UL94V-0 specifications for 100, 220 and 300mm ducting, and to UL94V-1 specifications for 30 and 50mm ducting), which means in the case of a fire, the gases emitted will not cause harm to personnel, buildings or transmission equipment, unlike some other brands of ducting.

This fibre optic ducting raceway products are manufactured to the highest quality standards (ISO9001), complying with the stringent requirements of UL2024A & ROHS and carry a 10 year warranty.

These Ducting Raceway items, conform to the following standards and requirements:

- ISO 9001 Certified Quality Management System by BSI
- Fire retardant plastic, Halogen Free, for 100, 220 and 300mm ducting the rating is UL94V-0, for 30 and 50mm ducting the rating is UL94V-1
- UL2024A standard
- EEU - ROHS requirements
- GR-63 Core Earthquake test compliance

This YellowDuct ducting~raceway system can be mounted from walls, ladder rack, Unistrut™, on raised floor support brackets, on floors, or to the top of equipment racks or frames. Over 350 individual components are available in 7 different sizes.

Selecting the ducting raceway size

The capacities listed below are recommended to ensure no damage will occur to the cords due to crushing. This is not the number of optical fibre cords that the ducting raceway will accommodate if completely filled.

DUCT SIZE	millimetres	30 x 30	50 x 50	100 x 50	100 x 100	220 x 100	300 x 100	600 x 100
	inches	1.25 x 1.25	2 x 2	4 x 2	4 x 4	8 x 4	12 x 4	24 x 4
Optical cable size / mm		2	2	2	2	2	2	2
CAPACITIES								
Straight ducting raceway		100	280	560	1110	2450	3340	6680
Ducting raceway with ramp-off					670	1470		
Vertical tee - straight through					1110	980		
Vertical tee downspout - drop					1110	1100		
Over the top outlet					670			
CONVULATED TUBING								
	Split 20 mm dia.	38 mm dia.	50 mm dia.	75 mm dia.	50 x 50 square			
Optical cable size / mm	2	2	2	2	2			
TUBING CAPACITY	22	125	220	360	280			

Note: Calculations are based on half full duct capacity - 50%

Ducting raceway mounting

This YellowDuct ducting raceway can be mounted from walls, ladder rack, unistrut, on raised floor support brackets, on floors, or to the top of equipment racks of frames. Select an appropriate mounting method from the examples shown otherwise you can contact your sales office or distributor for additional mounting options and custom solutions.

Cable entry and exits

Select the appropriate drop-off or outlet method from the following examples:

Round convoluted tube

Solid duct

Fibre cords can be simply routed via ramp off into or out of the ducting.

Cords can easily pass through the ducting to the next drop point or exit.

Single or dual high-density convoluted tube outlets.

Trumpet

Square convoluted tube

Colour coding for optimum cable management

Orange ducting is recommended for highlighting the redundant fibre network

With the ever increasing demand for zero down-time solutions in Data Centres and Telecommunications networks there has been a growing need for redundancy cable systems. To route both operating and redundant optic fibres in the yellow coloured ducting can create problems in identification of the redundant fibre and/or system. As a result there is an obvious need to differentiate between the operating and redundant networks of fibre optic cabling. To minimise the potential for costly mistakes in this area, we introduced orange ducting which is recommended for highlighting the redundant fibre network, thereby improving maintenance efficiency.

Note: All part numbers listed on the website are for yellow ducting, so when ordering black or orange ducting just add "O" for orange or "B" for black to the end of the relevant part number. However, black and orange are only available in duct sizes 100 x 100mm, 220 x 100mm & 300 x 100mm.

Black ducting is recommended for use with UTP 10 Gigabit copper

Parallel to the redundancy needs, a new issue has arisen in installations. The state-of-the-art 10 Gigabit copper UTP cabling also has very high demands on bend radius. This requires a new approach to the conventional metal cable trays (ladders, baskets, etc.). The conventional metal trays are not designed to provide safe bending radius and as a result we introduced black ducting. Again, this new black ducting has the same unique features and benefits of the yellow and orange ducting and allows clear distinction of the sensitive 10 Gigabit copper UTP cabling from the two Lightpaths optic fibre systems.

Ducting joiner options

The YellowDuct optical fibre ducting raceway system has 2 methods for joining the components together, slotted joiners or slotless joiners.

Slotted joiners require the ducting components to have slots on the ends so that it can be properly joined by clicking into place. A slotting tool will be required.

Slotless joiners require no additional tooling or for slots to be made in the side of the duct. They only require a screwdriver for installation to tighten the joiner into place

Note: All ducting components and lengths are supplied pre-slotted.

Draw a plan

Draw a view plan of the room/area where ducting raceway is required. Include cabinet sizes and positions as well as ladder racks, cable trays or air conditioning ducts. Denote duct size required in each area. Mark ducting raceway support bracket locations. The recommended spacing for mounting brackets is 900mm or 1.2m maximum.

For copper systems use 600mm spacing. Brackets should be mounted close to the joiners if possible. Draw a side view of all areas where the ducting raceway changes level or mounting system needs to change.

Material list

List all components required by part number and quantity from the following pages.

Note: Ensure that all components including joiners, mounting hardware, end caps, convoluted tube etc. are included. We recommend including 10% more joiners and brackets.

600mm x 100mm system

The 600mm x 100mm (24" x 4") ducting raceway system provides maximum capacity for routing and protecting optical fibre patch cords. Up to 7500, 2mm patch cords can be routed through the 600mm x 100mm ducting raceway system (50% fill rate), thereby doubling the capacity of the previous largest 300mm x 100mm system.

The 600 x 100mm ducting raceway system is compatible with most other ducting components, including drop-offs, outlets and reducers and is easy to install.

Part No.	Description
TC1279-406	600mm x 100mm straight duct length – 2 m
TC1279-408	600mm x 100mm to 300mm x 100mm reducer
TC1279-410A	600mm x 100mm joiner
TC1279-411A	600mm x 100mm 90° horizontal elbow
TC1279-412	600mm x 100mm horizontal tee
TC1279-414	600mm x 100mm 45° horizontal elbow
TC1279-425A	600mm x 100mm 90° vertical elbow
TC1279-416	600mm x 100mm horizontal cross
TC1279-435	600mm x 100mm end cap
TC1279-438A	600mm x 100mm duct mounting bracket assembly

Straight duct lengths

The YellowDuct straight duct lengths are available in seven sizes with or without covers. Slotted duct / raceway is available in some sizes for vertical drops or applications inside equipment racks to allow cords to exit through the side of the duct. Some sizes are available with hinged covers (hinges included in pack), or clip on covers.

All duct sizes come in 2m (6' 7") lengths, and where required, are slotted at each end for simply snapping together with an appropriate joiner. Most other ducting raceway brands are only available in 6 foot lengths - 10% shorter than YellowDuct.

Size (mm) Size (inches)	30 x 30 1.25" x 1.25"	50 x 50 2" x 2"	100 x 50 4" x 2"	100 x 100 4" x 4"	220 x 100 8" x 4"	300 x 100 12" x 4"	600 x 100 24" x 4"

These YellowDuct joiners are used to snap together system components and straight ducting raceway. They simply snap into the slots in the end of each piece to be joined.

"Slotless" joiners are available in sizes from 100mm x 50mm upwards and will join the ducting raceway components with or without joining slots

Note: For straight ducting raceway that has been cut to length, new slots need to be made with a suitable size slotting tool when using slotted joiners.

All components (tees, elbows, etc) come preslotted to aid speedy installation.

Tubing

YellowDuct tubing is used for feeding entering or exiting optical fibres from the ducting raceway into equipment racks. They are convoluted or ribbed, to allow adjustment if drops cannot be positioned exactly over or under equipment. Some are available with removable covers, or split for ease of cable installation.

Description	Yellow	Black
Convoluted tube 50mm dia (1 meter length)	TC1279-26Y	TC1279-26

Low profile ducting solution 220mm x 50mm (8" x 2")

The low profile duct solution can be used as a bridging adaptor and interconnection between two parallel lengths of duct where ceiling height constraints are an issue.

TC1279-461KIT includes the following:

- 2 x TC1279-461A over the top outlets
- 2 x TC1279-482 Joiners
- 1 x 0.66m length of low profile 220mm duct with cover

TC1279-461KIT
Low profile duct system joining kit

Solid duct only	TC1279-392
Solid duct with snap on cover	TC1279-392ASN

Provides a horizontal exit for optical fibre cords, anywhere along a straight 100mm, 220mm or 300mm duct run. The unit simply fits along the edge of the duct – i.e., the side of the duct is not specially prepared or cut. The outlet curve has no ribs so there is nothing to restrict the naturally occurring free flow of optical fibre cords. By altering the length of the connecting 220mm x 50mm duct, different offset spacings for duct systems can be made. Easily installed without having to cut or prepare the side of the duct.

Low profile straight duct lengths require the use of Slotted Joiners which are simple to install.

220mm x 50mm (8" x 2") - 2m lengths

The joiner is used to connect low height, 220mm x 50mm straight ducting to a top outlet assembly, horizontal outlet.

Straight duct lengths

TC1279-482
Joiner

TC1279-461A

Interconnection between 2 parallel duct lengths where there are ceiling height constraints

Data rack ducting & accessories

The Warren & Brown optical fibre ducting raceway is an Australian made solution for managing, routing and protecting fibre optic cords between termination equipment, patch panels and fibre optic splicing cabinets or frames. This cost effective and reliable solution has been used in telecommunications exchanges, data centres, universities, hospitals, or anywhere fibre optic cabling is present.

The ducting raceway range keeps growing and evolving as new products and solutions are developed and introduced.

External cable entry elbow

This 90° elbow is typically used to feed an optical fibre cable into a cabinet after the cable has “broken-out” into several optical fibres where ducting is not present. The elbow is fastened to the cabinet using an M50 nut, after passing through a clearance hole. The lower end of the elbow can accept either a 38mm dia. cable; or a convoluted tube, which houses the incoming optical fibre cable. The inner radius of the elbow is 56mm, and the internal diameter is 41.5mm; so, the elbow can typically accept a cable of around 37/38mm dia.

TC1279-434
Elbow, 90°, M50 X 1.5

Top outlet vertical drop & plastic mounting clips

The top outlet vertical drop can be attached to YellowDuct, metal tray and wire basket tray.

TC1279-531ASL
50mm top outlet vertical drop

TC1279-307ASLS
100mm top outlet vertical drop

This top outlet vertical drop also fits existing metal ductwork.

A pair of plastic mounting clips enables an over the top outlet (TC1279-290A & TC1279-307A) to be fitted to the existing wire basket or metal ductwork.

This enables optical fibre cords to leave the duct run at any position along its length, whilst maintaining the MBR at 30mm. The over the top outlet allows optical fibre cords to “drop-off” the duct run and feed equipment racks.

TC1279-307S-2
Mounting clips

These components provide different methods of allowing fibres to enter or leave the fibre optic ducting raceway. They can be purchased as kits or as individual items.

Side spill out kit

This drop-off assembly can be installed anywhere along the length of a 100mm high duct to allow up to 80 x 2mm optical fibre cords to leave the duct horizontally or vertically (if installed on the floor of the straight duct). Use cut out tool / hole saw TC1279-604KIT with a drill to make a cut into the ducting.

TC1279-602A
Duct side spill out, straight outlet to convoluted tubing

TC1279-609A
Duct side spill out, 90°, up / down / left / right to convoluted tubing

Side drop-off kits - 50 x 50mm exit

50mm (2") duct drop-off solutions are suitable for 50 x 50mm, 100 x 50mm, 100 x 100mm, 220 x 100mm and 300 x 100mm straight duct lengths.

- Use tool TC1279-50KIT to make cut-out in side of duct
- Round convoluted tube, square convoluted tube and straight duct components ordered separately

TC1279-41KIT
50mm (2") side drop-off (outlet) to 50mm dia. round convoluted tube

- Can fit approx. 80 x 2mm cables
- Also includes duct ramp

TC1279-41A
50mm (2") side drop-off (outlet only)

- Can fit approx. 80 x 2mm cables

TC1279-89KIT
Side drop-off to 50mm (2") square convoluted tube

- Can fit approx. 100-150 x 2mm cables
- Also includes duct ramp

TC1279-89A
Side drop-off (outlet) to 50mm square only

- Can fit approx. 100-150 x 2mm cables.

TC1279-93KIT
Side drop-off kit to 50mm ducting raceway

- Can fit between 100-150 x 2mm cables
- Full kit for vertical drop (includes duct outlet, duct ramp, joiner and vertical elbow)
- Straight duct lengths ordered separately

TC1279-93A
Side drop-off outlet to 50mm ducting raceway

- Can fit between 100-150 x 2mm cables
- Straight duct lengths, duct ramp, joiner and elbow ordered separately

Side drop off kits - 100 x 50mm exit

100 x 50mm duct drop-off solutions are suitable for 50 x 50mm, 100 x 50mm, 100 x 100mm, 220 x 100mm and 300 x 100mm straight duct lengths.

- Use tool TC1279-231KIT to make cut-out in side of duct.
- Straight duct components ordered separately

TC1279-232KIT
Side drop-off to 100mm x 50mm ducting raceway

- Can fit approx. 250-300 x 2mm cables
- Also includes duct ramp (TC1279-294)

* Down elbow not included in kit. Ordered separately - TC1279-236A

TC1279-232A
Side drop-off (outlet only) to 100mm x 50mm ducting raceway

- Can fit between 250-300 x 2mm cables

Side drop-off kits - 100 x 100mm exit

100 x 100mm duct drop-off solutions are suitable for 100 x 50mm, 100 x 100mm, 220 x 100mm and 300 x 100mm straight duct lengths.

- Use tool TC1279-231 to make cut-out in side of duct.
- Straight duct components ordered separately

TC1279-111KIT

Side drop-off to 100mm x 100mm ducting raceway

- This drop can fit between 500-600 x 2mm cables.
- Use tool TC1279-231 to make cut-out in side of duct.

TC1279-218A

Side drop-off (outlet only) to 100mm x 100mm ducting raceway

- This outlet can fit between 500-600 x 2mm cables.
- Use tool TC1279-231KIT to make cut-out in side of duct.

Express top outlet (clip on) drop-off kits 100 x 100mm exit

100 x 100mm express top outlet drop-off solutions are suitable for 100 x 50mm, 100 x 100mm, 220 x 100mm and 300 x 100mm straight duct lengths. These style outlets simply clip onto the top of the ducting raceway, providing an express outlet (drop) along a length of ducting. No slotting, bolting or cutting is required for installing these components onto the straight duct length.

- Simply clips onto the top of a straight duct length
- Straight duct components ordered separately

TC1279-290A

Express top outlet drop-off to 100mm x 100mm ducting raceway, horizontal

- This drop can fit between 300-400 x 2mm cables.

Note: TC1279-290ASL also available which contains slots

TC1279-307A

Express top outlet drop-off to 100mm x 100mm ducting raceway, vertical

- This drop can fit between 300-400 x 2mm cables.

Note: TC1279-307ASL also available which contains slots

High capacity duct outlets

These duct outlet kits provide the ideal solution for high capacity optical fibre cords. Duct outlets can be placed anywhere along the duct and minimal time and effort is required to install these outlet components. This solution allows for quick installation, as less cuts are required and is also stronger, as the ribs of duct are not cut.

- Simply clips onto the top of a straight duct length
- Straight duct components ordered separately

TC1279-452A

High capacity outlet, 100mm x 100mm (4" x 4") 90°

- Provides a 90° down bend (and break-out facility) at any point in a 100mm, 220mm or 300mm duct system.
- Can accept any standard 100mm x 100mm duct item using a joiner.

Includes:

TC1279-452 (90° down body)
TC1279-453 (90° down Lid)

TC1279-452KIT

High capacity outlet kit, single, 100mm x 100mm (4" x 4") 90°

- Provides a 90° down bend tube in a 100mm, 220mm or 300mm duct system.
- The 75mm ID/88 mm OD tube can carry either: 360 x 2mm cords; 210 x 2.4mm cords; or 160 x 3mm dia cords maximum.

Kit includes:

1x TC1279-452A
1 x 2m long convoluted tube TC1279-458
1 x TC1279-456 convoluted tube outlet

TC1279-454KIT

High capacity outlet kit, dual, 220mm x 100mm (8" x 4") 90°

- Provides a 90° down bend for two large size convoluted tubes in a 100m, 220mm or 300mm duct system.
- Each 75m ID tube can carry up to 360 x 2mm cords.

Kit includes:

1x TC1279-454A
2 x 2m long convoluted tubes TC1279-471
1 x TC1279-457 dual convoluted tube outlet

TC1279-454A

High capacity outlet, 220mm x 100mm (8" x 4") 90°

- Provides a 90° down bend (and break-out facility) at any point in a 100mm, 220mm or 300m duct system.
- Can accept any standard 220mm x 100mm duct item using a joiner.

Includes:

TC1279-454 (90° down body)
TC1279-455 (90° down Lid)

Other duct drop-off components

TC1279-212KIT
Radius guide (pack of 10) to suit 30mm, 50mm, 100mm slotted duct

Ramp up
TC1279-42 Small ramp up
TC1279-294 Large ramp up

Outlet trumpet
TC1279-93A 50 x 50mm
TC1279-218A 100 x 100mm
TC1279-330A 100 x 220mm
TC1279-379A 100 x 300mm

Miscellaneous items

TC1279-156

Universal radius guide

This guide is a simple means of providing a 30mm radius guide that eliminates fibre stress through bending.

TC1279-72KIT

Pigtail radius guide kit

The pigtail radius guide provides a 90° bend, but the guides are interlocking so that many can be joined to form U turns, circles & spirals as required (10 per kit).

TC1279-570KIT

Duct cable separator kit for 100mm, 220mm and 300mm duct

The duct cable separator kit is installed longitudinally along the length of a duct run, to provide a separator or divider in the duct. The item is used to create separate compartments for different cords or cables.

PVC slotted duct

This slotted duct is used for dropping off optical fibres from the overhead ducting system to racks & equipment subracks.

Description	Part No.
50 x 50mm x 2m	TC1279-55KIT
25 x 30mm x 2m	TC1279-58KIT
60 x 40mm x 2m (not slotted)	TC1279-99KIT

Mounting solutions

YellowDuct mounting hardware is used to support the ducting raceway from different structures. Although the most common components are shown here, many other components that have been developed for specific applications or customer requests are also available. Mounting systems are also available for retro-fitting to existing installations. Custom components can also be manufactured to your specifications. Please contact your sales office or distributor for assistance.

Metal mounting kits steel work or wall mounting

Provides vertical & horizontal mounting flexibility to steel-work or walls.

TC1279-438A

600mm x 100mm duct mounting bracket assembly

TC1279-103KIT

100mm duct support mounting bracket kit

TC1279-104KIT

100mm duct wall mounting bracket

The wall mounting bracket is used to attach 100mm plastic duct to any existing structure.

TC1279-133KIT

220mm duct wall mounting bracket kit

The wall mounting bracket is used to attach 220mm plastic duct to any existing structure.

Note: Version for 100mm duct is TC1279-104KIT.

TC1279-161KIT

30, 50, 100mm wall mounting extension kit

This flexible mounting kit is used to provide a means of attaching 30mm, 50mm and 100mm duct to any existing structure.

Note: Individual duct "C" type brackets are required in addition to this kit (see mounting hardware).

TC1279-183KIT

Mounting bracket kit, heavy duty, wall & strut

This kit has two vertical slots suited to wall or Unistrut™ mounting and provides a single long slot to accept duct mounting brackets up to 220mm size.

Note: Individual duct "C" type brackets are required in addition to this kit (see mounting hardware).

TC1279-152KIT

Dual level mounting bracket, 220mm and 100mm duct

The dual level mounting bracket is used to mount 3 ducting systems at 2 different heights, on a common bracket; usually to allow cross over between the 3 ducting systems.

TC1279-130KIT

Mounting bracket kit for 30mm, 50mm duct

This kit is a simple and adjustable means of attaching or mounting either 50mm or 30mm duct, in either a vertical or horizontal plane.

TC1279-78KIT

Mounting bracket kit for 30mm, 50mm duct

This is simply a bracket, that can be fixed to the duct and any existing building.

TC1279-303A

Side mounting bracket, heavy duty

This side mounting bracket is used to install & secure 100mm, 220mm, 300mm duct to existing threaded rods.

Note: Used in conjunction with "C" type mounting hardware.

TC1279-102

Wall mounting bracket

TC1279-126KIT

Wall mounting bracket kit, horizontal

Mounting hardware duct "C" type brackets

This assembly consists of a standard 30mm (50mm, 100mm, 220mm, 300 mm) duct support bracket. This assembly is used where the duct is directly mounted to flat brackets with 13mm (1/2" clearance) dia holes.

TC1279-147A

Size	Part No.
30mm	TC1279-148A
50mm	TC1279-147A
100mm	TC1279-16A
220mm	TC1279-15A
300mm	TC1279-297A

Suspension kits

These suspension mounting bracket kits are used to attach either 300mm, 220mm or 100mm plastic duct to existing steelwork, from above.

TC1279-297KIT

300mm heavy duty suspension duct mounting kit

TC1279-297AKIT

300mm x 100mm duct system, mounting bracket kit, suspension type, 1/2" with threaded rod

TC1279-297BKIT

300 x 100mm duct system, mounting bracket kit, suspension type, 5/8" with threaded rod

TC1279-106KIT

220mm duct suspension bracket kit

TC1279-106KITA

220mm duct suspension bracket kit (including 12mm threaded rod)

TC1279-106KITB

220mm duct suspension bracket kit (including 16mm threaded rod)

TC1279-107KIT

100mm duct suspension bracket kit

TC1279-107KITA

100mm duct suspension bracket kit (including 12mm threaded rod)

TC1279-107KITB

100mm duct suspension bracket kit (including 16mm threaded rod)

Underfloor mounting kits

TC1279-274

Under floor mounting bracket

TC1279-197KIT

Vertical strut mounting kit

This clamp is a means of attaching either a 220mm or 100mm duct system to (up to) 30mm (1") diameter tube or 25mm (1") square tubes in an under floor system.

Note: Used in conjunction with "C" type mounting hardware.

Ladder rack mounting

TC1279-370KIT

100, 220, 300mm Ladder rack mount kit, large

This clamp is a means of attaching either 100mm, 220mm or 300mm duct systems to 1" and 2" ladder racks.

Note: Heavy duty. Used in conjunction with "C" type mounting hardware.

TC1279-154KIT

Ladder rack mount assembly, 30mm and 50mm duct

These clamps are a means of fixing either 30mm and 50mm duct systems to 1.5" and 2" ladder racks.

Note: Used in conjunction with "C" type mounting hardware.

TC1279-155KIT

Ladder rack mount kit, 100mm and 220mm duct

These clamps are a means of fixing either 100mm, 220mm duct systems to 1.5" and 2" ladder racks.

Note: Used in conjunction with "C" type mounting hardware.

TC1279-572KIT

Support bracket, 220mm x 100mm duct

This supporting bracket set, enables a 220mm x 100mm duct system to be installed in the aisle, below the overhead super structure, in front of the racks to be serviced.

Unistrut™ mounting

TC1279-171

Mounting bracket adaptor

This bracket fits over 2" (50mm) square Unistrut™ section to provide a strong fixing position for: 300mm, 220mm and 100mm duct mounting brackets.

Note: Used in conjunction with "C" type mounting hardware.

TC1279-170

Bracket to suit Siemens frame

TC1279-59

Bracket to suit 41mm strut

"C" Rail mounting kits

These kits are attached to the rail by two screws. Multiple holes provide vertical adjustment in 21mm increments.

- Simple clamp system adapts to "C" rail
- Suits 100mm, 220mm or 300mm duct systems
- Includes: nuts, screws and washers

TC1279-155AKIT

"C" rail mounting kit, 100mm duct

Note: Includes 100mm duct bracket.

TC1279-155BKIT

"C" rail mounting kit, 220mm duct

Note: Includes 220mm duct bracket.

TC1279-155CKIT

"C" rail mounting kit, 300mm duct

Note: Includes 300mm duct bracket.

Raised mounting kits

TC1279-13A

Mounting bracket assembly, 220mm duct with M12 threaded rod

The mounting bracket provides an adjustable mounting mechanism for the 220mm plastic ducting system.

TC1279-14A

Mounting bracket assembly, 100mm duct with M12 threaded rod

The mounting bracket provides an adjustable mounting mechanism for the 100mm plastic ducting system.

TC1279-129KIT

Mounting plate kit, 30mm, 50mm duct

Is used for quick and easy attaching to 30mm & 50mm duct.

Ducting slotting tool - foot operated

Features & benefits:

- Ducting can be easily aligned and positioned on slotting jig
- Fast and easy to use slotting mechanism which slots in seconds
- Compact, easy to transport unit which only weighs 8kg
- Steady and robust platform
- Ergonomically designed, no stress or heavy manual operation required as it only requires leg power
- Conforms to OH&S standards
- Repeatedly produces accurate slots
- Slots an end of duct in less than 30 seconds

Note: Ideal for large installations.

Slots the following duct sizes:

Duct size (mm)	Duct size (inches)	Part No.
100mm x 100mm	4" x 4"	TC1279-23
220mm x 100mm	8" x 4"	TC1279-21
300mm x 100mm	12" x 4"	TC1279-275

Part No.	Description
TC1279-500KIT	Foot operated duct slotting tool (with tool box)
TC1279-500-13	Tool box - suit foot slotter (tool box only)

Side slotting tool

The slotting tool is used to make a small slot in the bottom and both sides at the end/s of duct. This process is a simple mechanical means of preparing a shortened length duct for connection to another standard part: e.g. elbow, cross connector, tees, adaptor assembly, duct end or drop offs, etc.

TC1279-118

TC1279-121A

TC1279-51

Part No.	Description
TC1279-230	for 100mm x 50mm duct (side slots only)
TC1279-51	for 100mm x 50mm duct (base slots only), for 220mm x 100mm, 300mm x 100mm, 100mm x 100mm
TC1279-118	for 50mm duct
TC1279-121A	for 30mm duct

Ducting hydraulic hand held slotting tool

The hand held hydraulic duct slotting tool is a revolutionary design that takes the stress and effort out of slotting duct. Take advantage of this new method of safely and easily slotting ducting, which will improve the efficiency of your installations and save you and your customer time and money.

Features & benefits:

- No need to exert excessive force since the unit is hydraulic powered
- Safe & easy to use
- Ergonomically designed
- Compact design which is easy to transport and doesn't require excess storage space.
- Saves you time by slotting duct quickly
- Allows you to slot an end of duct in less than 1 minute
- Lightweight, only 2kg
- Repeatedly produces accurate slots
- Slots a variety of duct sizes from 100mm x 50mm up to 300mm x 100mm

Slots the following duct sizes:

Duct size (mm)	Duct size (inches)	Part no.
100mm x 100mm	4" x 4"	TC1279-23
220mm x 100mm	8" x 4"	TC1279-21
300mm x 100mm	12" x 4"	TC1279-275

TC1279-501
100mm hand hydraulic tool

Part No.	Description
TC1279-501	100mm hand hydraulic tool
TC1279-501-13S	100mm hand hydraulic tool head
TC1279-501KIT	100mm hand hydraulic tool kit with tool box

Mitre kits

Mitre boxes are used to provide a means of producing an accurate and straight cut on ducting, essential for correct alignment of the slotting tools and joiners.

TC1279-118-07

Mitre box duct, 50mm, 30mm

TC1279-MITRE

Mitre box duct
300mm, 220mm,
100mm

TC1279-483A

Cut out jig, for
drop-offs and
break out guides
- suitable for all
ducts from 50mm
to 300mm

Duct spill out tool

TC1279-604KIT

Duct spill out and installation
template

This kit is used to cut the
60mm hole in the side
and bottom of the duct to
accommodate drop-outs
(TC1279-602A, TC1279-609A)

Note: If optic fibre cords
already in duct, use TC1279-50-
3 to protect the cords.

Miscellaneous items

100X060
Panel saw (jack)

TC1279-50-3
Fibre spreader and
protector

97X01
Wrench, ratchet
1/2" drive

62X001
Socket

Cut out tools

Cut out tools are used to cut notches in the side of the duct to accommodate drop-outs. They are supplied with a fibre spreader to protect previously installed fibres when using the tools.
